Power rating @ 60Hz		Power rating @ 50Hz	
Prime	72 KW	Prime	64 KW
Standby	80 KW	Standby	70 KW

Generator set comprising engine and alternator assembly mounted on fabricated steel profile baseframe. Baseframe is painted with a phosphate primer and top coat.

The alternator is directly coupled to the engine and the rotor is fixed to the flywheel using steel discs for flexibility. This assembly guarantees perfect alignment and the absence of vibration.

The engine is fixed to the baseframe using anti-vibration pads.

Automatic engine shutdown with LCD display for low oil pressure, high engine temperature, battery charge failure, overcrank and overspeed etc.

Exhaust System

Consists of residential exhaust silencer with 20-25 dB(A) noise reduction, stainless steel flexible hose and brackets. Optionally, a critical or hospital grade silencer can be supplied.

Alternator

Stamford / Newage Brushless Alternator. Electronic regulated via SX460 AVR keeping voltage within 1.5%. Windings are Class H insulated. All wound components are impregnated with polyester resin for resistance to acids and oils. Protection grade IP 22.

ELECTRICAL SYSTEM

Control Panel: Deep Sea 7310

The 7310 is an Autostart Control Module. The module is used to automatically start a generator set, upon application of a remote signal or by manual control. The module also provides indication of operational status and fault conditions, automatically shutting down the genset and indicating failures by means of an LCD display. The module features user selectable RS232 & RS485 communications, Ethernet communications, and a real time clock that provides accurate event logging. The module is DSENet compatible and includes a comprehensive list of timers and pre-configured sequences. This allows demanding industry specifications to be achieved.
